

Permanent Water Provision Plan Temporary Household Water Tank Program

The State of California Office of Emergency Services (OES) and Fresno County OES require that each household receiving a water tank for household water purposes understand that the tank is a *temporary, short term* provision of water only. It is not intended for long term, permanent use. The funding and authorization for this program could be discontinued at any time.

Therefore, a permanent plan for water provision into the home must be actively pursued. The two options for households served by private domestic wells are 1) drill a new or replacement well or 2) connect to a nearby public water system.

What is your plan?

Drill a new well

Name of well drilling company: _____

Estimated date of completion: _____

I am on a waiting list for a new well: _____ No _____ Yes (provide documentation)

Connect to a nearby public water system

Name of public water system you will connect to: _____

Estimated date of connection: _____

Name of public water system official that can verify this plan for your property: _____

Please initial:

_____ I understand that this is a temporary, short term water supply. It could be discontinued at any time and it is my responsibility to provide a permanent water source to this property.

_____ I understand that I will be contacted within 6 to 12 months to show progress toward my plan. If there is no progress, I understand my tank could be removed.

_____ *If this is a rental home*, and I am the property owner, I understand that if the current renter leaves, the tank will need to be removed and I cannot reoccupy the home until a permanent water solution is in place. It cannot be used for a new tenant.

Signed: _____ Date: _____

My physical address: _____
